Work Experience

IPRO Telesolutions

Timeshare Ownership Program
January 2024 – Present | Karachi, Pakistan

- Provided customer support services, ensuring quick issue resolution and maintaining a high client satisfaction rate.
- Lead Generation.
- Contributed to process improvements, reducing handling time and enhancing overall customer experience.

Personal Projects

Next Weather

Live Demo: https://next-weather-sable.vercel.app

Overview: A responsive and modern weather application built using Next.js, Tailwind CSS, and the OpenWeather API, delivering real-time weather updates.

Features & Highlights:

- Instant display of current conditions (temperature, humidity, wind, visibility, sunrise/sunset).
- 5-day forecast with clean, intuitive visuals.
- Mobile-friendly design using Tailwind CSS for responsiveness.
- API requests routed through Next.js backend, keeping the OpenWeather key secure.

Net-Switch

Code: github.com/Code-With-Abdul-67/Net-Switch

Overview: A lightweight utility for Linux that simplifies network adapter management.

Features & Highlights:

- Quickly enable/disable or switch between Wi-Fi, Ethernet, and other adapters.
- Minimalist interface ensures fast execution and ease of use.
- Saves troubleshooting and reconnection time, enhancing workflow for IT users.
- Built with low resource consumption and optimized performance.
- Fully open-source, allowing customization and community contribution.
